To: Charmley, William
Subject: Fuel efficiency rules for vehicles
Date: Thursday, March 16, 2017 4:44:14 PM

Mr. Charmley

The EPA's job is not to protect jobs or factories, its job, as indicated by its name, is to protect the environment. Fuel efficiency standards are one of our best tools in the fight against climate change. Please do not engage in short-term thinking, but safeguard our environment and the many species we share it with for future generations to enjoy. Scientists have estimated that if we do not act now, we will lose 50% of species in the next 50 years. That's not the world I want to leave to my grandchildren. Please uphold the stricter fuel economy standards goal for 2025. Our country has risen to many challenges; we can rise to this one as well.

Sincerely,
Andrea Gara
